# smartCharger™ and headphones: perfect partners for the imagineear professional line

All too often the charging rack and headphones are added as an afterthought. We have taken the opposite approach, building decades of experience into our peripherals from the outset. The keywords are high quality design and build, low total cost of ownership, compact and space saving, lasting and robust, and logistically efficient.

imagineear headphones

## The smartCharger's unique benefits

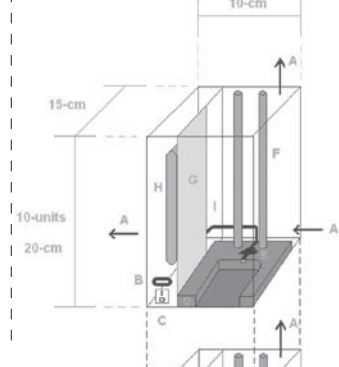

- ▶ imagineear's unique USB upload software means up to 128 players can be uploaded via a single USB connection, so 250-500 per PC depending on the number of USB slots.
- ▶ All files can be uploaded either locally or remotely via the web. The files and architecture are standard and open-platform, giving you back full control of the content production process.
- ▶ The smartCharger™ offers full visitor data capture in conjunction with the mediaPacker™ product line, both locally and via the web.
- ▶ Our ultra-compact and modular smartCharger™ rack solution takes next to no space, charges all players in imagineear's professional line, and allows multiple charging racks to slot together and run from a single power source.
- ▶ All imagineear's professional lines come with our WMI package as standard, and include a 2-year warranty and maintenance programme, and optional additional low-cost extended warranty and all risks insurance, designed also to protect you against accidental damage and shrinkage.

## smartCharger™ specifications

imagineear smartCharger™

## headphones specifications

- ▶ Size: 12x6x4cm (comparable to folded sunglasses)
- ▶ Type: open, behind the neck, foldable
- ▶ Weight: 46 g
- ▶ Nominal impedance: 32 Ohms
- ▶ Frequency :20hz-20Khz (-10 dB/1 kHz)
- ▶ Colour: lime-green
- ▶ Ear cover: removable and washable foam pads
- ▶ Connector: 3.5mm stereo jack
- ▶ Cable: 90 cm, iPod-style easy to replace (2.5mm connector at ear speakers)
- ▶ Options: headphone colour, subject to minimum order
- ▶ Certification: CE, ROHS, WEEE

## The imagineear headphones unique benefits

- ▶ imagineear's own-design headphones combine excellent sound quality, great value for money and design simplicity.
- ▶ The imagineear headphones provide a design solution for the most common point of failure; all headphones are sold with separable 70cm cables, which means:
  - Occasional rough treatment results in the cable separating safely before the cable/headphone connection is damaged
  - If the cable is damaged, there is no need to replace the whole headset, or ship it for repair. Simply replace a low-cost cable.
- ▶ The smartCharger™ and imagineear headphones are CE cleared, WEEE and ROHS compliant.
